

Student in group of 2 must choose 1 from the followings.

Note: The work must be your own work.

## 1. Programing

Create program to operate as one QoS system where report and presentation must show how the QoS system is operated. Also, report must evaluate when QoS is involved in the network and show how does it response.

## 2. Report

Report must include the description of the related QoS protocol in detail as well as analyze the protocol against the others. Also, report must suggest pro&cons for selecting which protocol for each situation.

Plus, pseudocode of programing that is detail enough to develop the code straight away.

assignment.txt

In both programming & report, student must present twice during the

semester.

1st presentation is before the Mid-term exam where student must

show the plan, design, progress and basic troubleshooting.

2nd presentation

is before the final exam where student must present the finished work with

work&report.

Note: If any part of the work is not your own work and has not been

referenced. The whole mark for this assignment will be deducted to 0 (zero)

and possible to take the further actions.
